

Visible and Infrared Camera Systems Suitable for Low Earth Orbit Geosynchronous Earth Orbit and Interplanetary Spaceflight  
“Issuance of responses to questions/comments received on Request for Information-NNG14FA94RFI”

Questions or Comments	Responses
<b>1.</b> Under number 6 “How to Respond,” you state that there is no limit on supporting documentation. Which items under number 5 “Instructions to Respondents” were considered supporting documentation?	<b>1. Supporting documentation includes any of the following that you may want to provide: system drawings, parts lists, electrical, optical, and software Interface Control Documents (ICDs). Note that none of these documents is required under this RFI, although they will be required under any future award. All other information listed in section 5 should be provided within the executive summary. Also note that you may submit separate responses for any of the items of interest: IR Cameras, Visible Cameras, or Miniaturized Cameras.</b>
